⬚ Genea   **⊘ Hanwha Vision**

Genea Security +
Hanwha VMS Integration

Access control and video, seamlessly connected for stronger security.

Managing multiple platforms while trying to respond to threats in real-time or conduct investigations can lead to missed incidents and slower resolutions. Integrate your Hanwha VMS with the Genea Security platform to eliminate gaps by combining access control and video surveillance into a single, intuitive experience.

Feature Highlights

View live video or playback streams directly from the Genea platform for faster response or more efficient incident review

Visualize camera locations and streamline device monitoring on interactive floor map for enhanced visibility
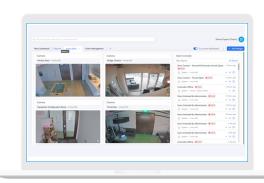

Pair video feeds with specific access points including doors, elevators, and more for simplified event verification

Intuitive deployment and reduced configuration time with automatic cameras sync
