

The Genea + Lumana Integration

Unify cloud-native access control with AI video security in a single view with the Genea + Lumana integration.

Verify Every Access Event

Genea Security knows the instant a door opens. Lumana's AI video shows what happened. Together they match every access event to live camera footage, so your team verifies who entered, catches tailgating as it happens, and investigates across access and video from one interface. No extra hardware, no on-site servers, no second system.

Intuitive Features

Integrating access control with your video management system has never been easier.

- ✓ Sync Lumana cameras to Genea doors, monitor points, control points, and sensors
- ✓ Match every access event to synchronized footage automatically
- ✓ Catch tailgating, forced entry, and after-hours access in real time with AI
- ✓ Quick-grant or lock doors directly from the video player
- ✓ View live and recorded video across Camera Wall, Floor Plans, Access Logs, and Alarms

Simple Setup

Genea Access Control + Eagle Eye gives you the security you need from only one dashboard.

-  Install the Lumana integration from the Genea Security dashboard (Admin access required)
-  Connect your Lumana account using your Lumana API key
-  Sync your Lumana cameras into Genea
-  Map your Lumana cameras to Genea doors, monitor points, control points, or sensors
