Genea Security +
Triton Sensor Integration

Smarter detection, safer outcomes, total awareness.

Prohibited activity and unseen threats in areas where cameras or other traditional security measures fall short leave teams without the visibility needed to respond quickly. With a Genea Security and Triton Sensor integration, you get real-time alerts for environmental or behavioral events, along with the contextual insights you need to take fast, informed action – all from a single platform.

Feature Highlights

- Detect up to 26 different behavioral or environmental events, including vaping, THC, CO, aggression, and more

- Receive instant notifications and event details including type, associated data, and time stamp for fast incident review

- View sensor health status, capture and review sensor trigger parameters for simplified diagnostics and auditing

- Monitor sensors in real-time and map sensors on interactive floor plans for visibility to incident location and event details
