Genea

Genea Security + IP Intercom Integration

Real-time communication with secure access management

Teams need flexibility and operational efficiency when managing building security and visitor interactions. By integrating your IP intercom with Genea Security, you can benefit from smooth visitor entry while maintaining secure access management, all from a single platform.

Feature Highlights

Conduct two-way audio and video communication for efficient visitor verification, grant access remotely from desktop app or mobile device

Configure call routing to ensure no call goes unanswered with sequential or simultaneous calls for prompt responses

Maintain detailed visitor call logs for compliance audits, track building activity and more

Visualize intercom locations and streamline device monitoring from interactive floor plans

Integrate any SIP enabled intercom
