The Genea + Milestone Integration

Centralize your video surveillance and cloud-based security with the Genea + Milestone integration.

Connect Video to Genea Security

IT and security teams can easily sync door access events to security video using this API integration. When access is attempted, the event or notification will appear in the Milestone platform.

Advanced Features

The Genea + Milestone integration gives you the security you need from one dashboard.

- Map live cameras directly to doors.

- Lock, unlock and "Quick Grant" doors from your Milestone dashboard.

- Search and add filters to find specific access events.

- Export and share access logs as PDFs.

Simple Setup

Integrating security with your Milestone video management system has never been easier.

- ✓ Click the integrations tab within the Genea Security dashboard.

- ✓ Install the Genea Security plugin.

- ✓ Enter your API Key.

- ✓ Launch your Milestone software.
