

# Genea Security + Shooter Detection Systems

**Instant detection, immediate response.**

Teams must consider speed, accuracy, and reliability in gunshot detection - all while effectively monitoring their physical security systems. With a Genea Security and Shooter Detection System integration, you can get instant notifications and simplified emergency response during an active shooter threat.

## Easy-to-use Features

Receive real-time notifications when a shot is detected

Identify and visualize a shooter location from an interactive floor plan

Contain active shooter threats with emergency lock downs or facilitate safe exit through unlocked doors

Easily deploy and manage integrated sensors and other systems from a unified dashboard

SDS Indoor and Outdoor Sensors provide 99.9% accuracy with dual-mode, acoustic and infrared flash detection technology for real-time alerting within ½ second.
