# The Genea Security + Salient Integration

View, record, and manage video security with the Genea + Salient integration.

Connection Through the Cloud

Genea + Salient combines the power of cloud-based access control with the advanced features of a video management system, providing a comprehensive security solution for enterprises, commercial real estate buildings and more.

Easy-to-Use Features

Genea + Salient is an intuitive solution that unifies otherwise isolated security systems.

Map doors to corresponding cameras. When an access event occurs, a video feed will appear in the Genea dashboard.

See live video from anywhere in your building or facility.

View multiple video feeds from one camera wall.
